Container Management

Create & Overview

1

Define Container

Navigate to **Create Container**. Enter a unique Name (3+ chars) and a clear Description for the new storage unit.

2

Set Capacity

Select the maximum storage allocation (MB) from the dropdown menu to define limits.

3

Activate & Create

Check "Mark Container as Active" to enable immediate usage, then click the **Create Container** button.

4

Verify Creation

Use the **Container Overview** panel (under Assign/Unassign) to verify the new container's status and details.

Naming Tip: Do not use special symbols. Keep descriptions under 260 characters for better readability in listings.

CREATE CONTAINER New Container Form

STORAGE WORKSPACE
NEW CONTAINER
Define name, description and capacity for a new 250 storage container.

CONTAINER NAME
Enter container name

Use 3 or more characters without special symbols; this name appears in logs and URLs.

CONTAINER DESCRIPTION
Describe what this container will be used for

Keep under 260 characters to help others quickly understand the purpose.

CAPACITY (IN MB)
Select

Choose the maximum storage allocation for this container; you can review usage later.

☒ **MARK CONTAINER AS ACTIVE**
Active containers are available to users for uploads and sharing.

CREATE CONTAINER

CONTAINER ACCESS ACCESS MAPPING

ASSIGN / UNASSIGN CONTAINER
Link users to containers or revoke access as part of routine administration.

SELECT CONTAINER **SELECT USER**
3232323 78576

Choose a container to assign or review its current owner. Pick the user account to receive or lose access.

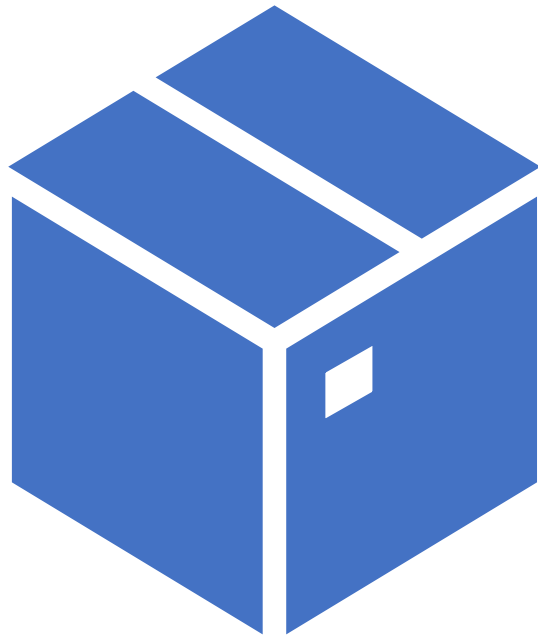

ASSIGN
UN-ASSIGN
CLOSE

SEARCH & FILTER
SEARCH CONTAINER SEARCH
SEARCH USER SEARCH

CONTAINER OVERVIEW CURRENT MAPPING
Browse containers with capacity, owner and creation metadata.

Container Management (Create Container)

- Define Container Name and Description.
- Select Storage Capacity (MB).
- Mark as Active and Click Create Container.
- Verify in Container Overview.

Navigation Path

Login → Admin Console → Create Container

Assign / Unassign Container to Users

Assign Steps:

- Select the Container from dropdown.
- Select the User.
- Click **Assign**.
- Confirmation message will appear.

Unassign Steps:

- Select Container.
- Select User.
- Click **Unassign**.

Navigation Path

Admin Console → Assign / Unassign Container

Assign Ownership

- Select a container and a user account.
- Click **Assign** to grant ownership or **Un-Assign** to revoke access.

CONTAINER ACCESS
ASSIGN / UNASSIGN CONTAINER
Container is assigned to container access as part of the user's permissions.

SELECT CONTAINER: 3232323
SELECT USER: T67N

Choose a container to assign or revoke to current owner. Click the user account to revoke or add access.

Admin Config

Delete Container

Warning

- Container deletion is irreversible.

Steps:

- Select the container from the dropdown.
- Review container details carefully.
- Click **Delete Container**.
- Confirm deletion in the popup.

Navigation Path

Admin Console → Delete Container

Edit Capacity

Purpose

- Allows administrators to increase or decrease container storage allocation.

Steps:

- Search for the container.
- Modify the **Capacity (MB)** value in the input field.
- Click **Update** to apply changes instantly.

Notes:

- Increasing capacity allows additional uploads.
- Reducing capacity below current usage may restrict further uploads.
- Changes take effect immediately.

Navigation Path

Admin Console → Edit / Search Capacity

Add / Delete Capacity

Purpose

- Define standard storage tiers available during container creation.

Features:

- Add predefined capacity options (e.g., 500MB, 1GB, etc.)
- Delete obsolete capacity values
- Maintain standardized storage allocation policies

Steps to Add Capacity:

- Enter capacity value (in MB).
- Click **Save Capacity**.
- New value becomes available in container creation dropdown.

Navigation Path

Admin Console → Add / Delete Capacity

User Management

- 1 **User Directory**
Navigate to **Add / Edit User** to view the full list. Use the Search bar to find accounts by UID or Name. Use the pencil icon to edit or trash can to delete.
- 2 **Add New User**
Click the **Add New** button to open the registration form. Enter the User ID, Name, Password, and Email. Select the appropriate User Type (Admin or User).
- 3 **Permissions & Groups**
Assign users to Groups (e.g., Finance, Marketing). Check the **Access Types** boxes to grant View, Download, Share, or Delete permissions.

Admin Tip: Use the "Change Password" button in the directory view to quickly reset user credentials without needing to delete and recreate the user account.

The screenshot displays the 'ADD / EDIT USER' interface, which is divided into two main sections: 'USER DIRECTORY' and 'USER PROFILE'.

USER DIRECTORY (EXISTING USERS): This section includes a search bar and a table of existing users.

Sno	UID	Full name	User type	Group type
1	test4	MUDIT SRIVASTAVA	U	Marketing
2	mu9t1	MUDIT SRIVASTAVA	U	Admin
3	Admin	ADMIN .	A	Admin,Sales,Marketing,D
4	a	A A	U	
5	oqeq	DADA SASA	U	
6	fdld	SA SA	U	
7	sasa	SASA SASA	U	
8	ghg	HGH HGHG	U	

USER PROFILE (ADD / EDIT USER): This section is used to capture identity, access type, and sharing options for a DSP user. It includes the following fields:

- USER ID*:** Text input field.
- PASSWORD*:** Text input field.
- CONFIRM PASSWORD*:** Text input field.
- FIRST NAME*:** Text input field.
- LAST NAME*:** Text input field.
- USER TYPE*:** Dropdown menu with 'Select' as the current option.
- EMAIL ADDRESS*:** Text input field.
- GROUP TYPE*:** Dropdown menu with options: Demo, Finance, Web, Test.
- SHARED OPTION*:** Dropdown menu with options: Shared by email, Shared to users.
- ACCESS TYPES*:** A list of checkboxes for permissions: VIEW, DOWNLOAD, SHARE, DELETE.

At the bottom of the form, there are buttons for 'REGISTER' and 'CLOSE', and a 'Step 3: Permissions' indicator.

ADD / EDIT USER

Purpose of User Management

The User Management module enables administrators to:

- View all registered users
- Add new users
- Edit existing user profiles
- Assign groups
- Define access permissions
- Reset passwords

Add New User

Steps to Add a User:

- Click **Add New**.
- Create and manage users through the admin panel.
- Assign role-based permissions (view, upload, download, delete).
- Users can only perform actions allowed by the admin.
- Restrict access using allowed IP addresses for secure login.
- Add/remove IPs to control network-based access.
- Define **Group Types** to organize users and containers for better access control.
- Enable **file/container sharing** within groups or specific users.
- Ensure secure collaboration through permission-based and controlled sharing access

Manage User IP

- View list of users along with their registered email and IP addresses.
- Monitor and control IP access for each user.
- Add new IP addresses to allow user access from specific networks.
- Delete existing IPs to restrict or revoke access.
- Enable secure access control through IP-based validation.
- Support user-level network management and security governance.

The screenshot displays the 'DATA COLLABORATION PLATFORM' interface. The top navigation bar includes a logo, the platform name, and the tagline 'INSIGHTS • COLLABORATION • GOVERNANCE'. On the right, there are icons for a moon, a bell, a 'WELCOME : ADMIN' message, and a 'Logout' button. The left sidebar contains a search bar and a list of menu items: DASHBOARD, CREATE CONTAINER, ADD / EDIT CONTAINER, ASSIGN / UNASSIGN CONTAINER, CREATE USER, **MANAGE USER IP** (highlighted), DELETE CONTAINER, ADD / DELETE CAPACITY, EDIT / SEARCH CAPACITY, GROUP TYPE, CONTAINER LOG DETAIL, and LOGIN DETAIL. The main content area is titled 'USER IP LIST' and contains a table with the following data:

User ID	Email	IP Address	Add IP	Delete
Admin	mudit@vagineprotechno.com	☐ 223.181.35.110	<button>Add</button>	<button>Delete</button>
DataadminUAT	surya@syrmasgs.com	☐ 128.185.47.210	<button>Add</button>	<button>Delete</button>
sandeep	sandeepshivhare05@gmail.com	☐ 223.181.35.110	<button>Add</button>	<button>Delete</button>
vaishnavi	VAISHNAVI@GMAIL.COM	☐ 49.43.117.225	<button>Add</button>	<button>Delete</button>

Assign Groups & Permissions

Group Type

- Users can be assigned to functional groups such as:
- Finance
- Marketing
- Admin

Group assignment helps organize access based on department or role.

Access Types (Permission Control)

Administrators can grant the following permissions:

- View
- Download
- Share
- Delete

Permissions determine what actions a user can perform on files within assigned containers.

Shared Options:

Define how users can share content:

- Shared by email
- Shared to users

This ensures controlled collaboration policies.

Group Type Management

1 View Existing Groups

Navigate to the **Group Type** section. Review the list of current organizational groups (e.g., Admin, Finance, Marketing, Web) to understand existing access structures.

2 Add New Group Type

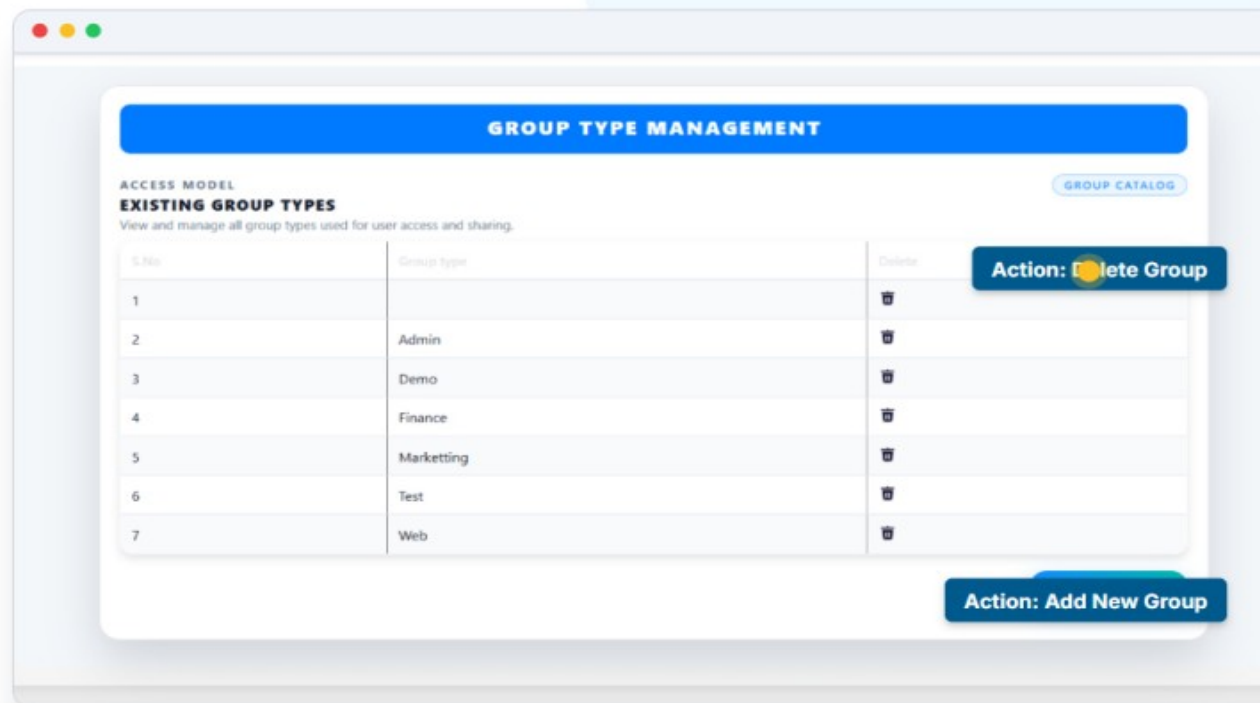

Click the **Add Group Type** button at the bottom right. Define a new business category to organize users and map specific access policies.

3 Delete Group Type

Use the **Trash Icon** in the 'Delete' column to remove obsolete groups.

Note: Ensure no active users are assigned to a group before deletion.

Best Practice: Use clear, role-based names (e.g., "Finance_Auditor") to make user onboarding and permission assignment intuitive.

Group Type Management

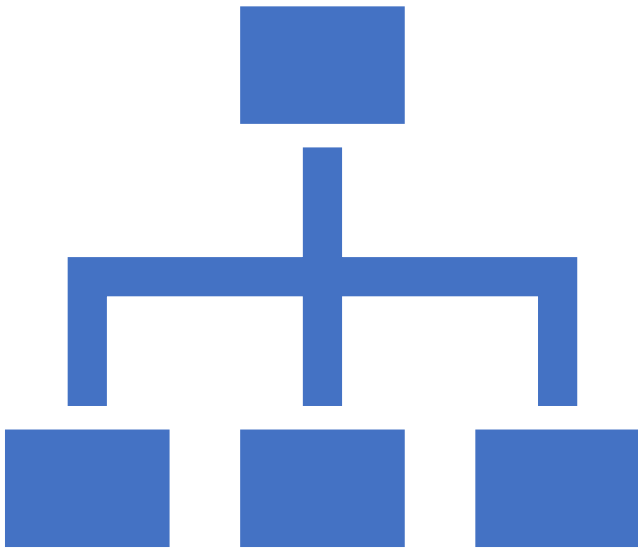

Purpose of Group Type Management

The Group Type module allows administrators to:

- Define organizational user groups
- Structure access control based on department or role
- Simplify permission assignment
- Maintain standardized access governance
- Groups help categorize users and streamline permission mapping.

Navigation Path

Admin Console → Group Type

Description

Displays a list of all configured group types within the system.

Information Available:

- Group Name
- Serial Number
- Delete Option

Example Groups:

- Admin
- Demo
- Finance
- Marketing

Add New Group Type

Steps:

- Click the **Add Group Type** button.
- Enter the new **Group Name**.
- Save the configuration.
- The group will now appear in:
 - User Management (Group dropdown)
 - Access mapping configurations

Use Case:

- Create new groups when:
- A new department is onboarded
- A new business function is introduced
- Segregated access control is required

Audit & Monitoring

Purpose of Audit & Monitoring

- The Audit & Monitoring module enables administrators to:
- Track all system and user activities
- Monitor login sessions and authentication details
- Review detailed file-level operations
- Support compliance and security audits
- Export logs for regulatory reporting

This module ensures transparency, traceability, and governance control.
